

POWERSTICK

RECHARGEABLE BATTERY KIT FOR SENSIT® GOLD G2

The **PowerStick** reduces hazardous landfill waste and improves efficiency on the job. It provides more than seven hours of runtime on a single charge and can be reused hundreds of times. The PowerStick also uses less energy because recharging batteries is more efficient compared to the cost and energy of disposing of depleted alkaline batteries and manufacturing new ones.

The PowerStick is the cost effective and environmentally sound choice to power your SENSIT GOLD G2. Forgot to charge your PowerStick? No problem. The Gold G2 can still be powered by 3 "C" cell alkaline batteries while the PowerStick recharges.

Save time, money, and be good to the earth. Use the PowerStick from **SENSIT Technologies**.

Specifications:

Chemistry: Li-ion
 Charge Time: <6 hours
 Battery Life: >9 hours @ 68°F (20°C)
 Charge Temperature: 32°F to 104°F (0°C to 40°C)
 Discharge Temperature: -4°F to 104°F (-20°C to 40°C)
 Storage Temperature: -4°F to 104°F (-30°C to 60°C)

Standard Kit: (Part# 871-00076)

PowerStick
 Battery Sleeve with Charge Port Cover
 Charger Wall Transformer
 Instructional Manual

Compatible Instruments:

SENSIT Gold G2

Approvals: UL, ATEX

Warranty: 1 year
